Experience

Opstree Global — Frontend Engineer Intern Jan 2025

- Delivered production-ready React components adopted across 3+ client projects, reducing per-feature UI build time by ∼**30%** through a shared reusable component library.
- Migrated from Raw Javascript to **React + TypeScript**, eliminating render-blocking scripts and lifting the Lighthouse performance score from **55 to 82**.
- Integrated REST APIs with robust error/loading state handling, cutting user-reported frontend bugs by ∼**40%** during UAT cycles.

Projects

CityCruise — MongoDB, Express.js, React, Node.js, ImageKit, Tailwind CSS January, 2024

Live Link

- Architected a full-stack car rental platform with JWT + bcrypt auth and RBAC; achieved **zero authentication bypass incidents** across all testing and production usage.
- Reduced average car-image load time by ∼**60%** by routing all media through ImageKit CDN with responsive thumbnails — no quality loss at any breakpoint.
- Built an admin dashboard covering full CRUD on vehicle inventory and real-time booking oversight, cutting manual operations effort to near zero.
- Structured a RESTful API across **10+ feature modules** with React Context API state management, achieving clean separation of concerns and zero cross-module state leaks.

ShadZen — Next.js, TypeScript, Tailwind CSS, ShadCN UI September, 2024

Live Link

- Implemented SSR on all data-heavy pages, improving Time to First Byte by ∼**45%** versus a client-side-only render baseline.
- Built **12+ reusable ShadCN components** (tables, modals, charts, form inputs), shrinking per-feature UI development from ∼4 hours to **under 1 hour**.

Awwards Video Games — React.js, TailwindCSS, GSAP, Framer Motion July, 2024

Live Link

- Engineered animation-first interactions using GSAP timelines and Framer Motion, achieving **sub-200 ms** response across all animated sequences.
- Attained a **95+ Lighthouse performance score on mobile** by leveraging Tailwind's utility-first CSS to eliminate every render-blocking stylesheet.

Technical Skills

Languages: C++, C, JavaScript (ES2022+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Node.js, Express.js, GSAP, Framer Motion, ShadCN UI, Prisma

Databases: MongoDB, PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Vercel, VS Code, Postman, Nodemailer, ImageKit

Problem Solving: 600+ LeetCode problems solved • 1600+ contest rating
